

Paul Schmidt, P.E.

Vice President

CMA Engineers

Paul is a Vice President with CMA Engineers with experience in a wide variety of civil and environmental engineering projects for municipal and industrial clients in New England. With a focus on client service, for over 26 years, Paul has worked on solving solid waste challenges ranging from environmental evaluations and closures of old 'unlined' landfills early in his career, to transfer station and recycling facilities evaluations, design and construction oversight, to full service engineering for operating secure (lined) solid waste landfills including permitting, operational assistance, design, and leachate and gas management. Paul also has experience in drinking water treatment, wastewater treatment and stormwater management. Paul was the project manager of an innovative leachate management system that was the recipient of a New Hampshire ASCE Outstanding Civil Engineering Achievement Award and an ASCE National Special Award for Innovation and Resourcefulness. Paul has a Bachelor's degree in Civil and Environmental Engineering from Clarkson University and a Master's degree in Environmental Engineering from the University of Massachusetts at Amherst.

In addition to serving SWANA NNE, Paul has given back through many years of service to the National Society of Professional Engineers including service to the governing bodies at both the state (NH) and national levels as well as multiple committee and Task Force assignments.
