

Peter Mohlin
Sr. Project Manager
St. Germain

Peter Mohlin is a Senior Project Manager at St.Germain, an environmental engineering consulting firm that specializes in helping clients in the waste and recycling industry. He and his team of scientists and engineers design and permit new facilities and keep them in compliance with environmental, health and safety regulations. Peter works for solid waste processing facilities, waste to energy facilities, transfer stations, and landfills and compost facilities, and helps clients acquire licenses for the beneficial reuse of waste derived products throughout the northeast. Peter currently serves as Secretary for SWANA's Northern New England Chapter. He is also a member of E2Tech, an organization focused on building Maine's environment and energy technology economy.
